

Have you been treated for prostate cancer?

Help us to develop a 'tool' that will give people more control after they've finished their treatment.

Come to our focus group to find out more!

What's this all about?

We want to help people have more control of their condition once they've finished their treatment for prostate cancer.

With your help – we'd like to develop a 'tool' or 'passport' which will help people to record their 'PSA' (prostate specific antigen) levels and know when to seek further help. It will also provide useful information.

Why should I get involved?

- It will help support people to be more in control following treatment
- You'll receive a £30 voucher to say thanks and be reimbursed for out of pocket expenses
- It will take less than 3 hours of your time

Who can get involved?

- Men who have been treated for prostate cancer, or their carers.

When will this happen ?

The focus group is likely to take place at 120 The Broadway in Wimbledon and will take around three hours. The date of the focus group is still to be confirmed – but we're hoping to hold it in June 2017.
