

# ‘JUST’ THE FLU?

THE FLU CAN BE VERY SERIOUS FOR THOSE WITH UNDERLYING HEALTH CONDITIONS. **THERE'S NO 'JUST' ABOUT IT.**

Each year flu kills around 11,000 people across the UK and hospitalises thousands more.

Flu can easily develop into something serious if you have an underlying health condition, which could even mean hospital treatment.

The **FREE flu vaccination** is available for those with an underlying health condition. It is the best protection for you, and those around you, against the flu.
