

**A cough that lasts  
three weeks or more  
could be a warning sign.  
Just contact your GP  
practice.**

**If you've had a cough for three weeks  
or more and it isn't COVID-19, don't  
ignore it. It's probably nothing serious  
but it could be a sign of cancer.**

**Your NHS is here to see you, safely.**
